

SOUFIANE HECHCHOUMI

Backend / Full-Stack Developer | Business Systems, Databases & Automation

Temara, Rabat, Morocco • +212 622-387225 • soufianehechchoumi@gmail.com

PROFILE

Full-stack developer with 3+ years of experience building business web applications, medical and stock management systems, ERP-style modules, dashboards and automation tools. Strong in PHP/Laravel, CodeIgniter, React/JavaScript, Python automation and SQL/MySQL database modeling. Comfortable using AI-assisted development tools including Claude, Cursor and Codex, with interest in reliable backend architecture, document processing, workflows and scalable systems.

CORE FIT

Backend systems	Laravel, CodeIgniter, PHP, REST APIs, Python scripts
Data layer	SQL/MySQL schema design, relationships, CRUD modules, reporting
Frontend	React, JavaScript, HTML/CSS, Bootstrap; TypeScript working knowledge
Automation	Document/OCR tools, bots, data-processing and workflow scripts
Reliability	Debugging, production support, role/permission systems, reports
AI-first tools	Claude, Cursor, Codex, Git/GitHub, MySQL Workbench, VS Code

PROFESSIONAL EXPERIENCE

Web Developer — MJTECH | 2023 - Present

- Develop and maintain web applications with PHP, Laravel, CodeIgniter, JavaScript, jQuery, Bootstrap, HTML and CSS.
- Build business modules for stock management and patient management across different medical specialties.
- Work on database integration, bug fixing, customer requirements, dashboards and application improvements.

Freelance Full-Stack Developer — Client Projects & Independent Work | 2021 - Present

- Delivered multiple freelance projects over the last 3 years, including websites, business applications, dashboards and admin panels.
- Built solutions with PHP/Laravel, WordPress, JavaScript/React and MySQL, from requirements to deployment support.
- Created Python automation tools, data-processing scripts, document conversion/OCR workflows and technical bots.

Web Developer Intern | 2022 - 2023

- Developed web applications and websites using WordPress and PHP; supported front-end integration and technical fixes.

SELECTED PROJECTS & DOMAINS

- ERP / school management systems: personnel, roles, schedules, attendance, payroll, dashboards and reporting modules.
- Document and invoice automation: PDF/Word conversion, OCR workflows, structured data extraction and file-processing tools.
- Trading and data tools: Python bots, strategy testing, market-data monitoring, logs, risk rules and performance reports.
- Medical and stock systems: patient workflows, inventory management and multi-specialty clinic management features.
- AI-first automation: use Claude, Cursor and Codex to speed up development, refactoring, prototyping and repetitive workflows.
- Client/server operations: GitHub workflows, environment setup, Linux server deployment, CloudPanel/Cloudflare-style provisioning.

TECHNICAL SKILLS

Backend	PHP, Laravel, CodeIgniter, Python, REST APIs, basic Node.js/TypeScript
Frontend	ReactJS, JavaScript, HTML5, CSS3, Bootstrap 5, JSON, AJAX, jQuery, Redux
Databases	SQL, MySQL, MongoDB, Access, MySQL Workbench, database relationships and reporting
Tools	Git/GitHub, Claude, Cursor, Codex, VS Code, PHPStorm, PyCharm, Photoshop

EDUCATION & LANGUAGES

OFPPPT — Full Stack Developer, Digital Development | 2021 - 2023

Baccalaureate — Life and Earth Sciences | 2018 - 2021

Languages: English, Arabic, French

Tailored for remote Backend / Full-Stack roles focused on business systems, data workflows and automation.
